

SUPER CHARGING THE SEED ELEMENTS FOR THE GATEWAY SEED PROJECT OF THE UNIVERSAL GATEWAYS

This is an explanation of how to work with the natural Seed Elements to prepare them for the Divine Time Vessels and the Seeding Ceremony of the Universal Gateway, whenever you find an Element that you are guided is for this sacred work, specifically for the seeding of the Universal Gateway in the land of Damanhur, Italy, that we intend to build together, as well as the Australian and Mexican Gateways that have been seeded already.

The most powerful way to Prepare and Activate the Seed Elements will be via **the 3 New Moon Ceremonies in World Wide Link up with members of the Divine University and the Mamos of the Sierra Nevada de St Marta**. For details see the email, or the Sirius Library website.

This document explains the process of Activating and Charging the Seed Elements. It may help you to follow the process and prepare all you need before the New Moon Link ups. If you are unable to join the Live Link ups, you can register to receive the recording, to do the ceremony in your own time, as close to the new moon as you are able to.

Register your Seed Element - You will need to register your Name and Seed Element via the Sirius Library website link – This will enable us to record all elements that will co-create the Divine Time Vessels. Thank you so much.

PREPARATION OF THE SEED ELEMENT

When you are guided to prepare and charge a natural Seed Element for the Divine Time Vessels, you are to collect three pieces of the Element – three elements of the same Element – and keep them together.

Before you charge the Elements you need to prepare 3 little pieces of silk and three strings to wrap each of the Elements in, plus a little bit bigger silk with a longer string to wrap the three Elements together. Each little piece of silk needs to have a little clear mark for either Feminine or Left, Masculine or Right, Soul or Centre, so you can recognize the pieces easily.

When you have worked with the Elements once (to charge them), keep silk around each element and a little string in three circles at all times. Three rings around the Element create a ring of consecration and protection. So you bind it with three circles. And then place a little piece of silk around all three of the Elements to keep them together, wrapped in silk, so they are not touching each other physically, and bound with another string in three circles around it.

You will have a little bundle of three little pieces of each Element you are guided to (seeds, stones...), in silk, bound with a little string in three circles and you keep them together in a little bundle of silk around it. The silk creates protection and harnesses the energy, so it doesn't leak out.

More than one Seed Element

If you collect another Seed Element, you do the same thing with that. You collect three pieces of that Element. You charge them. You wrap them. You keep the bundle in a separate piece of silk. So you end up with little bundles in silk with three circles of strings.

SUPER CHARGING THE ELEMENTS

Before the Seeding Ceremony, when we do the seeding of the Universal Gateway and we bring all your bundles with every body else's together to put into the Time Vessel, you need to charge each of the elements three times in a special way.

You'll be guided to the right place, where you charge the elements. You charge them with the Divine Forces of the Field of Life.

In the Field of Life, there is the Oneness. There are also the Primary Forces. We can call this the Holy Trinity. When we are doing this, you are representing one of the Primary Forces, the Soul, and the other two are the Masculine and Feminine Principles held in your right and left hand – they can be called other names, but for now we call it Masculine and Feminine Principles.

Your Connection to the Suns, the Earth and the Field – your Pillar

It all starts with going inside. You are actually moving the Field of Life. These energies or Primary Forces are coming straight from the Field into the Elements.

Before we charge the Elements, we connect our pillars, by sending the energy from your heart and central pillar into the Earth Core and up to the Suns. When you are in that state, you would have all felt your state shift a bit, where your energy felt a shift.

When you are connected into the Suns and the Earth Core, you always go into a higher connection, a higher state of consciousness. When you are in that state, you can charge very easily, because you are connected through all your chakras, your energy into the Suns and into the heart of the Mother Earth. Let's just call that the Pillar or place of Connection.

When you make the connection first, through this axis into the Earth and the Suns, and then expand into the Field, you become aware of those Primary Forces, or you can call on those Forces.

Or you can just start to do your spiritual work that you normally do, because all spiritual works have a resonance to this to some degree. There are all different levels of the Oneness, many paths to this, and your own powerful spiritual work that you do, I am sure you can incorporate into this. No need to change your spiritual work to incorporate this technique and the charging of the elements.

Charging with the energy from the Field through spiralling motion in your hands

Place 2 of the Elements between your thumb and pointer finger and middle finger of each hand – either at the tips or somewhere – you will naturally find your place. Between the thumb and these two fingers (pointer and middle finger) is a very powerful receptive and transmissive energy.

The third Element can sit in your chest region, inside your bra or shirt. Or you can put it in a pocket, as long as it is on your body. That is the one element that is making contact with your body when you do the charging process.

1. In your right hand you are drawing in the Masculine Principle of Life, drawing little circles/spirals with your thumb, pointer finger and middle finger holding the element – in anticlockwise direction.
2. In the left hand you are drawing in the Feminine Principle of Life, drawing little circles/spirals with your thumb, pointer finger and middle finger holding the element – in clockwise direction.
3. At the same time the movement is inside yourself, you are the third Alchemical Principle, holding the third element on your body or in your pocket.

The circular movement ends up like this – holding your hands in front of you, on the left and right, moving the elements in spirals towards each other and towards yourself.

The energy comes in and it comes stronger and stronger and stronger from the Universe and Earth.

You will feel the charge through your whole arms, when the energy from the whole Field comes in, you'll feel it as a very strong energy. You'll feel it build. The motions may become very strong and fast for a while. Then they calm and slow down, when the charging is complete.

You are balancing the Masculine and Feminine forces, and the Soul, the three Primary Forces in all of life as you are doing this, when you are in full presence with it, when you are in your pillar.

This is a technique that is a little bit like the Arhuaco Mamos in Colombia work. They do something very similar.

Your Mind during the Charging

At the same time you create the spiralling motions, you can have your mind in pure stillness, or purely focused on something that is an extraordinary focus, and you are charging the actual focus of that into these sacred Elements.

Dropping into the Earth

The more you drop your energy into the Earth, the stronger the charge gets. While you focus your mind and move the Elements in your hands in the spiralling motions, you sink down, travel down deep into the Earth. You go into your larger body of energy then, which sometimes can be as big as the Earth Mother's body. You go down, into the planet, you are one with the planet.

The more you do that, the more powerful you charge the Elements, because the magnetic forces in the Earth, that part of the divine force, actually attracts so much high concentration quickly into the actual centre of the focus – your element.

STORING YOUR SEED ELEMENTS - After the Charge wrap your Elements in the clearly marked silks to keep them safe and charged

After the charging, it is very important to keep the Elements separate, so they don't touch each other, never allow them to physically touch each other. They can touch through the silk, as the silk allows them to keep the charge.

Each of the Elements holds a very different charge. This is a very strong charge of the Masculine Force and a very strong charge of the Feminine Force, and the third Force is the Soul. You don't want to alchemically marry

these forces without a purpose. The purpose is all being held for when we make the Time Vessels and seed it into the Earth during the Ceremony.

So it is very important you don't touch the elements together physically, until the Ceremony. Keep them separate through wrapping them each in their appropriate silk. **Make a clear little mark (L – R – M, or F – M - S) to know which one is left and right and centre (Feminine/Masculine/Soul) and which one is the centre (Soul).**

Second and Third Charge

You need to charge the Elements three times for each Element, for them to be prepared well enough to go into the Divine Time Vessels.

If you are guided to get 10 different Elements (3 pieces of each – Fem/Masc/Soul), you will do 30 processes of charging. If you are guided to just have 1 element (eg the chestnuts from Matva Sei) you do the charging process 3 times.

When you charge the Elements again, and when you come to the ceremony you need to know clearly, which one is the Masculine and Feminine, and which one is the Soul piece. All wrapped up in silk, so they don't touch each other.

To do the second and third charge, you unwrap the Elements in a sacred place where you are guided to do the charging. While unwrapping, you keep the Elements separate on their pieces of silk, so you know which piece is left and right and on your body.

Then you place the Elements on your body and in your left and right hand, and charge according to the process described above. Let the energy grow stronger and stronger. The spiral movements may become very fast for a while and then naturally become still when the charging is complete.

When the charging is complete, you wrap your sacred Elements again in their appropriate silks, bind them three times and then wrap them all together in the silk, and bind that again three times.

You can now keep the little silk bundles in a sacred place, for the next charge or to keep them for the Seeding Ceremony.

Welcoming others to Become Supporters of the Universal Gateways

There may be others who may like to prepare sacred Seed Elements for the Divine Time Vessels. You can translate this document in Italian or another language, and you can demonstrate this process.

Every Seed Element will need to be registered via the Sirius Library website -
<https://thesiriuslibrary.com/gateway-seed-project>

We give thanks to each one of you, and to the Primary Forces of the Field of Life! Thank you so much for your sacred work!
